

Sustainability

Like you, we know that sustainability is important for our world now and for the future. That's why we've taken on this challenge. We're working to use resources sparingly and to be mindful of the environment. We're investing time and effort into making our hotel sustainable without our guests having to give up on the comfort that they're used to enjoying.

- Energy checks by experts
- Motion detectors for lighting in hotel corridors
- Timers for façade lighting
- Lighting with LEDs in all public areas
- No air conditioning in hotel rooms
- Key card system with main switch in hotel rooms
- No minibars in 85% of hotel rooms
- Refrigerators activated only upon request
- Water-saving technology in the aerators and showers

- Avoid disposable packaging in catering
- Waste separated in accordance with municipal requirements
- Optimize supply chains by sourcing from regional suppliers
- Feature mostly regional wines
- Include vegan and vegetarian dishes on the menu
- Offer local honey as a give away for guests

- Pack guest items in the room without plastic
- Post tips on how to reduce towel use
- Clean rooms according to guests' request
- Use ecofriendly cleaning and washing supplies
- Avoid use of fabric softeners

Embracing positive change for the future through modern, ecofriendly hospitality-

*...that's our little
taste of home!*
